

Education

2023 B.Tech, Kalinga Institute Of Industrial Technology

CPI: 8.68

Professional Experience

Optum | Senior Software Engineer

(May 2023 – Current)

• EasyTest

(July 2024 – Current)

- Implemented **major new features** across multiple application pages during the rewrite process, ensuring **modernized architecture**, **improved maintainability**, and **enhanced user experience**.
- Accelerated application **performance** by optimizing **DLL loading** on a critical page, drastically reducing load time from **5–10 minutes to under 10 seconds**.
- Engineered **three major keyboard shortcut features** to enhance application **accessibility** and streamline user **navigation workflows**.
- Spearheaded the **migration of Docker images to Artifactory SaaS**, architecting and optimizing **Dockerfiles** to ensure highly efficient **CI/CD builds and deployments**.
- Integrated **Podman support** to pull container images directly from Artifactory, ensuring seamless migration from Docker after its decommissioning and maintaining efficient **CI/CD workflows**.
- Proactively identified and resolved **20+ critical issues and performance bottlenecks**, significantly enhancing overall **system stability and scalability**.
- Developed robust file **import/export functionalities** across multiple formats, streamlining complex **data processing pipelines**.
- Boosted overall **code coverage by over 50%** by authoring comprehensive **React unit tests** for 20 critical application pages.
- **Technologies Used: JAVA, Spring Boot, React, Github Co-pilot, Codex, Claude, Specs-kit, REST APIs, Maven, Postman, Docker, Podman, MongoDB, Artifactory SaaS, Git, GitHub.**

• Webstrat

(June 2023 – November 2024)

- Engineered a rapid data entry module, empowering users to accurately populate 30–40 categorized data fields in **under 3 seconds**.
- Built a customized UI printing solution, offering flexible **"Print All" and selective page printing** capabilities to improve user reporting.
- Architected a test automation repository with reusable interaction functions, **automating 70% of manual test cases** and achieving an **85% overall automation rate**, drastically reducing QA cycles.
- Partnered with the security team to remediate **5,000+ recurring CodeQL vulnerabilities** down to just 20, enforcing strict adherence to enterprise security best practices.
- **Tech: .NET, React, JavaScript, Microsoft SQL Server, docker, Git.**

HighRadius | ARPA Developer

(January 2022 – December 2022)

- Maintained and optimized Java-based backend architectures, resolving critical client-reported defects.
- Analyzed and resolved **20+ complex JIRA tickets**, meeting strict SLAs.
- **Technologies:** Java, MySQL, Eclipse, JQuery.

Academic Projects

• CodeCollab – Real-Time Code Editor

- Built a collaborative code editor using React, Node.js, and Socket.IO.
- Implemented syntax highlighting, live editing, and version history.
- Added multi-user collaboration with conflict resolution algorithms.

• Real-Time Chat Application with WebSockets

- Designed a secure messaging platform using React, Node.js, and Socket.IO.
- Implemented end-to-end encryption for private chats and group channels.
- Added real-time notifications, typing indicators, and file sharing features.

Technical Skills

- **Programming Languages:** Java, C++, C, C#, .NET.
- **Core Competencies:** System Design(LLD), Data Structures & Algorithms, Object-Oriented Programming, CI/CD.
- **AI Tools :-** Gemini, Codex, Claude, Specs-kit, Github Co-pilot.
- **Tools & Databases:** Git, GitHub Actions, Docker, MongoDB, Microsoft SQL Server, MySQL, SonarQube, Rally.

Certifications and Achievements

- Recognized among the **Top 150 employees at Optum** for exceptional performance in the **AI Dojo training program**.
- **Microsoft Certified: Azure Fundamentals (AZ-900)**
- **Microsoft Certified: Azure AI Fundamentals (AI-900)**
- Achieved a **5-Star Rating** on CodeChef in competitive programming.
